Conservation Economics: Week 1

The correct answer is in **bold**.

| Assignment number | Question number | Question |
|---|---|---|
| **1** | 1 | In the word root for *conservation*, servare stands for<br>a. together<br>b. **to keep**<br>c. house<br>d. manage |
| **1** | 2 | Phillips curve shows the relation between<br>a. profit and loss<br>b. marked price and selling price<br>c. **inflation rate and unemployment rate**<br>d. electricity consumption and heat output |
| **1** | 3 | "the ability of a single economic actor (or small group of actors) to have a substantial influence on market prices" is known as<br>a. price power<br>b. **market power**<br>c. externality<br>d. economic power |
| **1** | 4 | "an increase in the overall level of prices in the economy" is<br>a. **inflation**<br>b. deflation<br>c. stagflation<br>d. priceflation |
| **1** | 5 | In the word root for *conservation*, con stands for<br>a. **together**<br>b. to keep<br>c. house<br>d. manage |
| **1** | 6 | Input costs that do not require an outlay of money are<br>a. explicit costs<br>b. **implicit costs**<br>c. opportunity costs<br>d. phantom costs |
| **1** | 7 | In the word root for *Economics*, nemein stands for<br>a. together<br>b. to keep<br>c. house<br>d. **manage** |
| **1** | 8 | The property of distributing economic prosperity uniformly among the members of society is a definition of<br>(a) efficiency<br>**(b) equality**<br>(c) prudence<br>(d) sustainability |
| **1** | 9 | In the word root for *Economics*, oikos stands for<br>a. together<br>b. to keep<br>c. **house**<br>d. manage |
| **1** | 10 | "fluctuations in economic activity, such as employment and production" are referred to as<br>a. **business cycles**<br>b. economic cycles<br>c. production cycles<br>d. market cycles |

Conservation Economics: Week 2

The correct answer is in **bold**.

| | | |
|---|---|---|
| **2** | 1 | Which of these is a pillar of sustainability<br>a. **(a) social sustainability**<br>b. **(b)** industrial sustainability<br>c. **(c)** agricultural sustainability<br>d. **(d)** trans-boundary sustainability |
| **2** | 2 | Which of these is not a pillar of sustainability?<br>a. (a) environmental sustainability<br>b. (b) economic sustainability<br>c. (c) **trans-boundary sustainability**<br>d. (d) social sustainability |
| **2** | 3 | Which of these is a positive check according to Malthus?<br>a. (a) late marriage<br>b. (b) **war**<br>c. (c) celibacy<br>d. (d) moral restraint |
| **2** | 4 | The Trinity explosion of 1945 is taken as the beginning of the<br>a. Holocene<br>b. Cenocene<br>c. **Anthropocene**<br>d. Eocene |
| **2** | 5 | The demographic transition sees a society move from<br>a. high birth rate, low death rate to low birth rate, high death rate<br>b. low birth rate, high death rate to low birth rate, low death rate<br>c. **high birth rate, high death rate to low birth rate, low death rate**<br>d. high birth rate, high death rate to low birth rate, high death rate |
| **2** | 6 | The logistic growth equation curve is<br>a. I-shaped<br>b. J-shaped<br>c. **S-shaped**<br>d. U-shaped |
| **2** | 7 | According to Malthusian model,<br>a. **(a) Population grows in geometric progression, food supply increases in arithmetic progression**<br>b. **(b)** Population grows in geometric progression, food supply increases in geometric progression<br>c. **(c)** Population grows in arithmetic progression, food supply increases in arithmetic progression<br>d. **(d)** Population grows in arithmetic progression, food supply increases in geometric progression |
| **2** | 8 | The book "An Essay on the Principle of Population" was written by<br>a. (a) Darwin<br>b. (b) **Malthus**<br>c. (c) Spencer<br>d. (d) Owens |
| **2** | 9 | The quantum of human impacts can be written as<br>a. I = P + A + T<br>b. I = P X A + T<br>c. **I = P X A X T**<br>d. I = P + A X T |
| **2** | 10 | Which of these is a preventive check according to Malthus?<br>a. **(a) foresight**<br>b. **(b)** vice<br>c. **(c)** misery<br>d. **(d)** flood |

Conservation Economics: Week 3

The correct answer is in **bold**.

| | | |
|---|---|---|
| **3** | 1 | "the potential or capacity of a material to have adverse effects on living organisms" is<br>a. vulnerability<br>b. susceptibility<br>c. sustainability<br>d. **toxicity** |
| **3** | 2 | ___ determines which projects or developments require a full or partial impact assessment study. (Fill in the blank)<br>a. **(a)screening**<br>b. **(b)**scoping<br>c. **(c)**reporting<br>d. **(d)**review |
| **3** | 3 | Macrodebris in the context of plastic debris has fragments of size<br>a. **(a) > 20 mm**<br>b. **(b)** 5 - 20 mm<br>c. **(c)** < 5 mm<br>d. **(d)** < 1 mm |
| **3** | 4 | "Any changes in natural or human systems that inadvertently increase vulnerability to climatic stimuli; an adaptation that does not succeed in reducing vulnerability but increases it instead" is a definition for<br>a. (a) adaptation<br>b. (b) mitigation<br>c. (c) **maladaptation**<br>d. (d) malmitigation |
| **3** | 5 | "the extent to which a chemical is available for uptake into an organism" is<br>a. **bioavailability**<br>b. bioaccumulation<br>c. biomagnification<br>d. bioresponse |
| **3** | 6 | Hydrocarbons derived directly from mineral oils are<br>a. **petrogenic hydrocarbons**<br>b. pyrogenic hydrocarbons<br>c. biogenic hydrocarbons<br>d. chemoenic hydrocarbons |
| **3** | 7 | "the relative effect of exposure" is<br>a. vulnerability<br>b. **sensitivity**<br>c. sustainability<br>d. toxicity |
| **3** | 8 | The increasing concentration of a substance, such as a toxic chemical, in the tissues of tolerant organisms at successively higher levels in a food chain is called<br>a. bioavailability<br>b. bioaccumulation<br>c. **biomagnification**<br>d. bioresponse |
| **3** | 9 | Mesodebris in the context of plastic debris has fragments of size<br>a. (a) > 20 mm<br>b. (b) **5 - 20 mm**<br>c. (c) < 5 mm<br>d. (d) < 1 mm |
| **3** | 10 | ___ is used to identify which potential impacts are relevant to assess. (Fill in the blank)<br>a. (a)screening<br>b. (b)**scoping**<br>c. (c)reporting<br>d. (d)review |

Conservation Economics: Week 4

The correct answer is in **bold**.

| | | |
|---|---|---|
| **4** | 1 | Which of these is not a physical factor of habitat?<br>a. (a)soil<br>b. (b)moisture<br>c. (c)**predators**<br>d. (d)temperature |
| **4** | 2 | Which of these correctly represents the process of habitat fragmentation and loss?<br>a. **(a)Original forest → Dissection → Perforation → Fragmentation → Attrition**<br>b. **(b)**Original forest → Dissection → Attrition → Fragmentation → Perforation<br>c. **(c)**Original forest → Dissection → Perforation → Attrition → Fragmentation<br>d. **(d)**Original forest → Dissection → Fragmentation → Perforation → Attrition |
| **4** | 3 | A root zone treatment plant is an example of<br>a. **(a)phytoremediation**<br>b. **(b)**biological control<br>c. **(c)**biomagnification<br>d. **(d)**bioaccumulation |
| **4** | 4 | "The rate of any biological process is limited by that factor in least amount relative to requirement, so there is a single limiting factor." This is the statement for<br>a. (a) **Liebig's law of the minimum**<br>b. (b) Liebig's law of the maximum<br>c. (c) Shelford's law of tolerance<br>d. (d) Shelford's law of intolerance |
| **4** | 5 | The movement of individuals away from their place of birth or hatching or seed production into a new habitat or area to survive and reproduce is called<br>a. (a)translocation<br>b. (b)migration<br>c. (c)**dispersal**<br>d. (d)drifting |
| **4** | 6 | Which of these is a stochastic factor?<br>a. (a)birth rate<br>b. (b)death rate<br>c. (c)population structure<br>d. (d)**environmental fluctuation** |
| **4** | 7 | The movement of lions across the Gir landscape is an example of<br>a. **(a)diffusion**<br>b. **(b)**secular dispersal<br>c. **(c)**jump dispersal<br>d. **(d)**drifting |
| **4** | 8 | The acronym HIPPO does not include<br>a. (a)habitat loss<br>b. (b)invasive species<br>c. (c)**pollination**<br>d. (d)pollution |
| **4** | 9 | I tried growing vegetables under my teak plantation, but the vegetable plants died out. I should be concerned about<br>a. (a)autophagy<br>b. (b)allelophagy<br>c. (c)autopathy<br>d. (a)**allelopathy** |
| **4** | 10 | The regular, seasonal movement of animals, often along fixed routes is called<br>a. (a)translocation<br>b. (b)**migration**<br>c. (c)dispersal<br>d. (d)drifting |

Conservation Economics: Week 5

The correct answer is in **bold**.

| | | |
|---|---|---|
| **5** | 1 | Fire protection is<br>a. private good<br>b. **club good**<br>c. common resource<br>d. public good |
| **5** | 2 | “the ability to produce a good using fewer inputs than another producer” is<br>a. comparative advantage<br>b. **absolute advantage**<br>c. production advantage<br>d. resource advantage |
| **5** | 3 | Which of these is not a method of internalisation of externalities?<br>a. tradable pollution permits<br>b. charities to social causes<br>c. command-and-control policies<br>d. **free market** |
| **5** | 4 | Public goods are<br>a. excludable, rival in consumption<br>b. non-excludable, rival in consumption<br>c. excludable, non-rival in consumption<br>d. **non-excludable, non-rival in consumption** |
| **5** | 5 | Club goods are<br>a. excludable, rival in consumption<br>b. non-excludable, rival in consumption<br>c. **excludable, non-rival in consumption**<br>d. non-excludable, non-rival in consumption |
| **5** | 6 | “the impact of one person’s actions on the well-being of a bystander” is<br>a. actor-observer effect<br>b. **externality**<br>c. internality<br>d. benefits principle |
| **5** | 7 | “a simplified description, especially a mathematical one, of a system or process, to assist calculations and predictions” is the definition of a / an<br>a. equation<br>b. **model**<br>c. philosophy<br>d. process dynamics |
| **5** | 8 | “a measure of happiness or satisfaction” is<br>a. **utility**<br>b. satiety<br>c. gladity<br>d. value |
| **5** | 9 | Clothing is<br>a. **private good**<br>b. club good<br>c. common resource<br>d. public good |
| **5** | 10 | Private goods are<br>a. **excludable, rival in consumption**<br>b. non-excludable, rival in consumption<br>c. excludable, non-rival in consumption<br>d. non-excludable, non-rival in consumption |

Conservation Economics: Week 6

The correct answer is in **bold**.

| | | |
|---|---|---|
| **6** | 1 | "the claim that, other things being equal, the quantity supplied of a good rises when the price of the good rises" is a statement of<br>a. law of demand<br>b. **law of supply**<br>c. law of quantity demanded<br>d. law of quantity supplied |
| **6** | 2 | "a table that shows the relationship between the price of a good and the quantity supplied" is<br>a. demand table<br>b. demand schedule<br>c. supply table<br>d. **supply schedule** |
| **6** | 3 | Coffee powder and sugar are<br>a. substitutes<br>b. **complements**<br>c. club goods<br>d. public goods |
| **6** | 4 | "a graph of the relationship between the price of a good and the quantity demanded" is<br>a. **demand curve**<br>b. supply curve<br>c. Laffer's curve<br>d. Phillips curve |
| **6** | 5 | "a measure of how much the quantity supplied of a good responds to a change in the price of that good, computed as the percentage change in quantity supplied divided by the percentage change in price" is<br>a. price elasticity of demand<br>b. income elasticity of demand<br>c. cross-price elasticity of demand<br>d. **price elasticity of supply** |
| **6** | 6 | "a good for which, other things being equal, an increase in income leads to an increase in demand" is<br>a. **normal good**<br>b. inferior good<br>c. Giffen good<br>d. common good |
| **6** | 7 | "a measure of how much the quantity demanded of one good responds to a change in the price of another good, computed as the percentage change in quantity demanded of the first good divided by the percentage change in price of the second good" is<br>a. price elasticity of demand<br>b. income elasticity of demand<br>c. **cross-price elasticity of demand**<br>d. price elasticity of supply |
| **6** | 8 | "a graph of the relationship between the price of a good and the quantity supplied" is<br>a. demand curve<br>b. **supply curve**<br>c. Laffer's curve<br>d. Phillips curve |
| **6** | 9 | "a legal minimum on the price at which a good can be sold" is<br>a. price ceiling<br>b. **price floor**<br>c. selling ceiling<br>d. selling floor |
| **6** | 10 | "a table that shows the relationship between the price of a good and the quantity demanded" is<br>a. demand table<br>b. **demand schedule**<br>c. supply table<br>d. supply schedule |
